Experience

Tenchi Security

Backend Engineer

📅 May 2024 – present

📍 *Remote*

- Developed an integration for retrieving data from Cloudflare, enhancing operational insights and accessibility.
- Developed a data feed to integrate an internal API with Archer, enabling seamless data flow and functionality.
- Maintained and developed an internal SDK/CLI, streamlining client integrations and improving developer experience.

xippTech

Software Developer

📅 June 2023 – May 2024

📍 *Remote*

- Developed an Odoo module for SLA and task recurrence management in helpdesk operations, improving service efficiency.
- Generated translation files for individual modules, expediting project delivery timelines and enhancing localization.
- Designed an activity workflow for insurance implementation control, ensuring streamlined processes and compliance.

Raízs

Software Developer

📅 September 2019 – June 2023

📍 *Remote*

- Developed an Odoo module for integration with the VTEX platform, streamlining data synchronization and operations.
- Created an Odoo module for product markup calculations, enhancing sales efficiency and pricing accuracy.
- Designed an Odoo module integrating the Juno service for automated boleto issuance, simplifying financial processes.
- Built an integration service with the iFood supplier platform, enabling seamless data exchange and order management.
- Developed a recommendation service for product substitution in shopping carts, optimizing user experience and inventory management.

Belga.io

Software Developer

📅 Jan 2019 – September 2019

📍 *Remote*

- Designed and implemented streamlined cryptocurrency arbitrage components leveraging JavaScript, Redis, Web-Socket, and Docker for efficient market operations
- Refactored and optimized legacy codebases, transitioning from Python to JavaScript, with an emphasis on performance enhancement and maintainability.
- Developed new integrations for the open-source CCXT library, enabling expanded functionality and market connectivity.

Education

Universidade Anhembi Morumbi

Bachelor's Degree, Computer Science

📅 August 2023 – present

📍 *São Paulo*

ETEC - Escola Técnica Estadual de São Paulo

Technician, Information Technology

📅 January 2018 – July 2019

📍 *São Paulo*

Skills

Languages: Native: Portuguese — **Advanced:** English

Technologies: Python, Javascript, Typescript, SQL, NoSQL

Developer Tools: Git, AWS, GraphQL, RabbitMQ, Docker, Redis

Frameworks: NestJs, Express.js, Flask, Odoo, React.js
